

So that you arrive safely!

Parking garage

To access the parking garage, you need the key, which you can collect in the key box at the house entrance with the code you received. Parking lot 308 is reserved for you in the garage. This is in the middle row on a mobile platform and is relatively narrow. In order for the parking lot to be positioned by the system so that it can be driven on, you have to use the operating system on the first pillar of the garage.

- Enter number 308
- Insert the key and turn it to the red mark
- Wait until the system stops
- Press reset and remove the key

Further information can be found directly on the column or call 076 531 48 48.

ATTENTION: the parking spaces are rather narrow. If parking is not possible at all, you can use the parking spaces outside. Since these are subject to charges, it is important that you report to me that you are using an outdoor space instead of the garage space. So I can report it to the administration, who will then release the garage space during this time so that you have no additional costs.

Second car:

If you are arriving with two cars, you have the option of parking the second vehicle in an outside area (Seewiesstrasse) for a fee. The vehicle is registered using a voucher, which you can obtain from the caretaker (door next to the indoor pool). The space costs CHF 10.00 per night. The full amount must be handed in to the caretaker (Olaf Kreuzen) in an envelope.

Arrival by train

Davos Dorf train station is just a few minutes' walk from the apartment. Take the Swiss Federal Railways (SBB) to Landquart, then the Rhätische Bahn (RhB) to Klosters or Davos.
